

PRESS RELEASE

Royal Caribbean Group enters partnership with the Mærsk Mc-Kinney Møller Center for Zero Carbon Shipping

COPENHAGEN – MAY 23, 2022 – Today, Royal Caribbean Group and Mærsk Mc-Kinney Møller Center for Zero Carbon Shipping formalized their collaboration by signing a Partnership Agreement. With the agreement, Royal Caribbean Group becomes a Corporate Strategic Partner to the Center, committing to a long-term strategic collaboration and contribution to the development of zero carbon technologies and solutions for the maritime industry.

Royal Caribbean Group is one of the leading cruise companies in the world with a global fleet of 63 ships traveling to more than 1,000 destinations around the world. In 2021, the cruise company unveiled a comprehensive decarbonization strategy titled Destination Net Zero, aimed at achieving zero carbon emission cruising by 2050. An ambitious approach that aligns with the overall strategy of the Center to decarbonize the maritime industry by 2050.

In welcoming Royal Caribbean Group to the Center, **CEO Bo Cerup-Simonsen** said:

“Royal Caribbean Group provides unparalleled capabilities and insights to the decarbonization agenda. The company has a long history of innovation with their partners and have enormous competence in relevant areas such as ship design, safety, emissions management, and energy efficiency in design and operation. We welcome them onboard and look very much forward to the collaboration,” said Bo Cerup-Simonsen.

In joining the Center, **Jason Liberty**, Royal Caribbean Group President and CEO, said:

“Collective action is imperative as we deploy our Destination Net Zero strategy to decarbonize our business and catalyze innovation for our industry,” said Jason Liberty, Royal Caribbean Group President and CEO. “By joining the Center Royal Caribbean Group aligns itself with a network of like-minded companies with an unrelenting drive to find solutions for a sustainable future.”

Shipping’s roadmap to decarbonization

With 100.000 ships consuming around 300Tons fuel p.a. global shipping accounts for around 3% of global carbon emissions, a share that is likely to increase as other industries tackle climate emissions in the coming decades.

Achieving the long-term target of decarbonization requires new fuel types and a systemic change within the industry. Shipping is a globally regulated industry, which provides an opportunity to secure broad-based industry adoption of new technology and fuels.

To accelerate the development of viable technologies a coordinated effort within applied research is needed across the entire supply chain. Industry leaders play a critical role in ensuring that laboratory research is successfully matured to scalable solutions matching the needs of industry. At the same time, new legislation will be required to enable the transition towards decarbonization.

About the Mærsk Mc-Kinney Møller Center for Zero Carbon Shipping

Royal Caribbean Group

Mærsk Mc-Kinney Møller Center
for Zero Carbon Shipping

The Mærsk Mc-Kinney Møller Center for Zero Carbon Shipping is a not-for-profit, independent research- and development center working across the energy- and shipping sectors with industry, academia, and authorities. With Partners, the Center explores viable decarbonization pathways, facilitates the development and implementation of new energy technologies; builds confidence in new concepts and their supply chains; and accelerates the transition by defining and maturing viable strategic pathways to the required systemic change. The Center is placed in Copenhagen but work with partners globally.

The Center was founded in 2020 with a start-up donation of DKK 400m from the A.P. Moller Foundation. Corporate Partners to the Center include: Alfa Laval, American Bureau of Shipping, A.P. Moller - Maersk, bp, Cargill, DP World, Hapag-Lloyd, MAN Energy Solutions, Mitsubishi Heavy Industries, Mitsui, NORDEN, NYK Line, Seaspan Corporation, Siemens Energy, Stolt Tankers, Sumitomo Corporation, Swire Group, Topsoe, TotalEnergies and V.Group.
